Forecast for Tuesday 19 Jan 2021

Weather: A few light snow or sleet showers overnight but becoming dry with some clear spells and a sharp frost, some freezing fog and mist forming in place and very cold. After dawn there will be some sunny spells throughout the morning with just scattered cloud. Any mist or fog should clear. Sunshine becoming hazier in the afternoon with more cloud developing but mainly dry throughout. A mixture of cloud and some clearer spells overnight too.

Chance of cloud free mountain/hill tops above 800m: 80-90% just a little scattered cloud shrouding the summits at times, especially first thing in the morning.

Visibility: Very good visibility is likely, poor in any early morning mist or fog.

Met Office Aberdeen Meteorologist's View

Winds becoming very light later on but a severe wind chill is likely on the munro tops.

Forecast for Wednesday 20 Jan 2021

Weather: Becoming cloudy from the east and despite a mainly dry start outbreaks of snow will develop particularly for the eastern Grampians. Snow may become quite persistent in the afternoon and start to drift in strong northeasterly winds. Further south and west will see the best weather during the day with the Ben Alder hills staying clear for much of the day. A period of heavy snow is likely on Wednesday night with very strong northerly winds causing blizzards on the hills.

Maximum wind: Northeasterly 10-15mph

Chance of cloud free mountain/hill tops above 800m: In the west 70%, more in the way of low cloud in the afternoon. In the east by the afternoon 20% or less as low cloud gathers around 400m and above.

Visibility: Generally good in the morning but as snow outbreaks begin visibility will deteriorate with possible whiteout conditions by early evening. The best visibility will be on western summits.

Temperature: **Glens:** Minus 2 rising to Plus 4 Celsius.
At 800m: Minus 5 Celsius.
Freezing level: 200m or less
